Add in Logo/Heading and other menu items (Methodology, contact, etc.)

Change to "Filter by State"

Change to "Filter by Indicator"

Add a pull-out tab with the word "Instructions"

Make this into the dropdown options menu (see separate example)

Choose State

United States

Indicator

× Severe COVID Case Complications   × % Smokers

Instructions

Legends
Severe COVID Case Complications
65

0
Los Angeles   Cook   Maricopa   Queens   Kings   Miami-Dade   Bronx   Nassau   Suffolk   Harris

Last update: 23 mins ago.

Make this the legend (can it be horizontal?) OR it can be vertical and on left of map (create more white space btwn instructions and map and put it there)

Move bar chart down (under new title) and left to be flush with map

Last Updated at (M/D/YYYY)
3/6/2020, 7:33:03 AM

Add a "Last Updated" indicator like this

Change title and move to be flush with left of chart (and closer to chart). More white space above the title than below

Add in other module from ARCgis (maybe Score rankings; team needs to discuss if this metric is what we want)

```
FIPS= 29179
County= Reynolds
State= Missouri
Severe COVID Case Complications= 49.454591577879256
covid_cases= 5
Years of Potential Life Lost Rate= 10087.875439
% Fair or Poor Health= 20.948095633
% Smokers= 20.591366496
% Adults with Obesity= 31.6
% Adults with Diabetes= 13.7
% 65 and over= 23.16917173
```

Can this box show the state title at the top in a larger font (instead of "State = Missouri" ?)

Example for "Dropdown Options Menu" (on right of map)

Dropdown menu mock up:

(Make arrows even smaller)

Select a Metric:

☐ **Severe COVID Case Complication Score** ▶

☐ **Risk of Severe Economic Harm Score** ▶

☐ **Need for Mobile Health Resources Score** ▶

etc...

■ **Severe COVID Case Complication Score** ▼

Likelihood that constituents will develop severe complications from a COVID-19 infection.

Includes:
Number of COVID Cases
% 65 and older
% Adults with Obesity
% Adults with Diabetes
% Smokers Years of Potential Life Lost Rate
% Fair or Poor Health
